Clover dashboard app login

Vote for an existing Idea() or Thank you for sharing your feedback. Look for a short update to replace some of the functionality you've mentioned. Once you apply the update, please let us know what you think. We have huge plans for the development of the Clover Dashboard app, and will release updates regularly. Of the choice, you can access all the previous focation by log in to your account in clover.com/dashboard/login. Don't see your mind? We have made changes to our security increased and have to reset your password. We've just sent you an email to. Click on the link to create a password, then go back here and sign in. Open the Mac App store to purchase and download apps. Clover Dashboard provides a snapshot of the business you do with Clover. It's simple, intuitive, and interactive, making it easy to see your sales, most popular items, and employee performance at a glance. October 22, 2020 Version 3.1.5 Thanks for using Clover Dashboard! This release includes fixed-use improvements that keep the app optimized for reliability, functionality, and ease-of-use. There's a lot to like about this app – that they could see sales in real time, with ability to review transactions, etc – but it's very kirky and not always reliable. That can be frustrating. My favorite feature in this app when it first came out was the app for my Apple Watch. I liked being able to see sales from my view quickly without having to take my phone. I had trouble occasionally with him from time to time. Several months ago the watch app just left working together. I have sent messages to supporters and never received a reply. Very frustrating. Why is it even available if it won't work?! I agree with other reviews. This app seems to be going down, and no one seems to be responsible to make sure it continues functioning properly. I had it with this system. And now you update an app to have no function?! Everyone complains and you say there's another update coming soon? Who would ever update an app to have no functionality? Why wouldn't you wait until it was completed if that was ever your plan. I'm sure you guys realize everyone hates it and now you're climbing around to fix it. You guys have no idea how stores work. This system is terrible. If you own a convenient store with more than 1 employee then this system is not for you unless you want a lot of work. You have to download another app to separate sales for each employee. If you make a return, the system does not put it back into your inventory. OH and if you're not hit done within 30 seconds of 5 minutes your card transactions will become VOID! Please check your sales because once they told me this I came back and found sales drained due to this. Customer support is terrible. It always goes offline. You can't see what it comes out of stock, you have downloaded your inventory of the computer and good luck getting it organized because if you have it in a category you still have to label its seen on shine in its category. Save your money and time. Let's start with the inventory management. Categories must be alphabetized by drag and drop. There is no option to automatically alphabetize by categories. When you add inventory to categories. You offer zero narrow options down the list of items I'd like to add. I can either go through lines by line or add literally every item to my inventory in the category. Try letting us itemize the categories editing list by label? Actually, Try adding that to each list. I want to be able to be the list items when I am string items in label categories or modified. It is seriously an hourly task to rework my inventory would be needed with these features it could be a 5 minute job. Literally, and be clear. I mean literally to its complete meaning. It could literally be reduced by 55 minutes. Also. Sub categories in the Category section? So can I be more similar items by brand or type or type of nicotine strength? This is actually basic quality of life stuff. I have many more complaints. I am so irritated by the terrible design and sluggish. I know it might seem like minor downsides but these add up. Also. Add a feature to old receipt search by card number. Why can't I stick a chip in and have the transactions page pull up all receipts for that card? Square offers that. It's a simple but life saving feature. For real. Make some changes to your programming or we'll pull out of the dark within 6 months. The developer, Clover Networks, Inc., did not provide details about its privacy practices and handling of Apple data. For more information, see the developer's privacy policy.
